Hi Jack,

An important customer (ZhongAn Insurance) plan to use DMS migrate the database to the AWS Ningxia region;

It is found that the option of DMS service is missing in IAM policy (the option of DMS can be found in Global IAM), should this problem be reported to you to solve?

China screenshot:

**Create policy**

A policy defines the AWS permissions that you can assign to a user, group, or role. You can use the Visual editor or the JSON editor and using JSON. [Learn more](#)

**Visual editor** **JSON**

[Expand all](#) | [Collapse all](#)

▼ Select a service

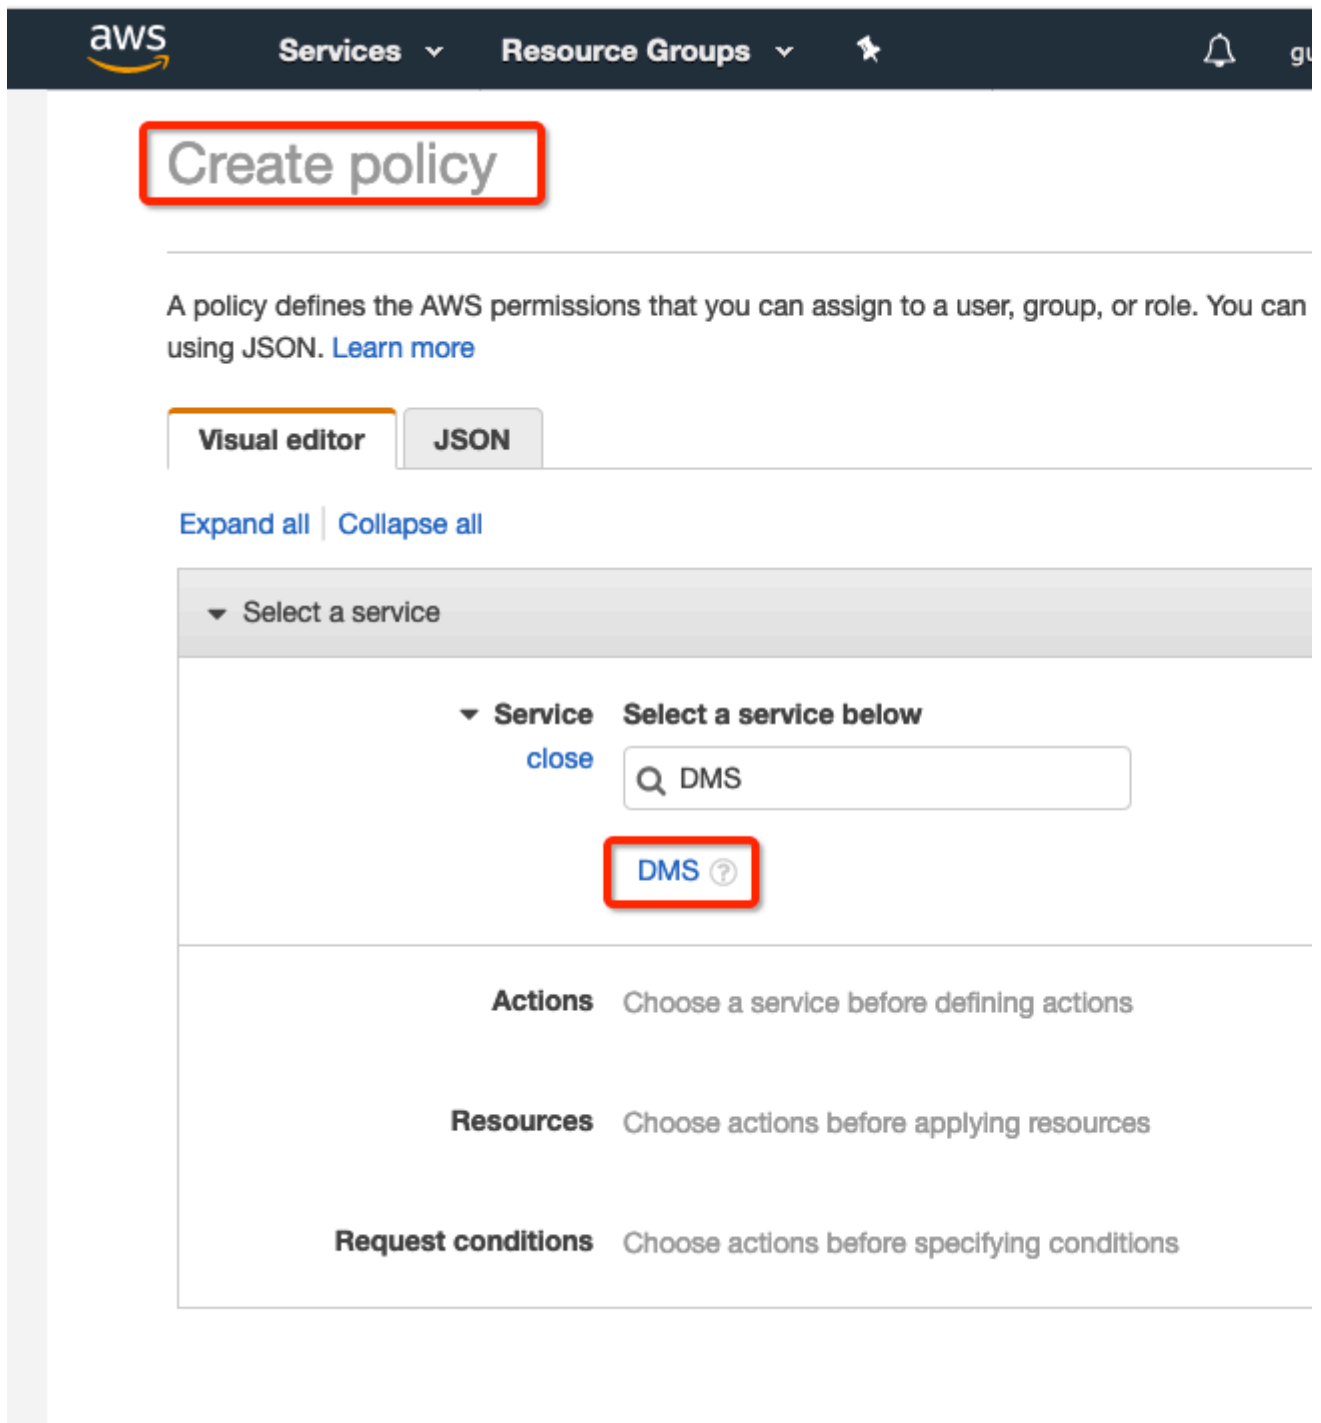

▼ Service Select a service below  
close

**Actions** Choose a service before defining actions

**Resources** Choose actions before applying resources

**Request conditions** Choose actions before specifying conditions
